

FOR THE WORKSHOP / ABRASIVE AND GRINDING STRIP DISCS / STRIP DISCS /
Fiberglass base

Product reference

50511-120

Fibreglass concave base flap
disc for wood-metal grinding,
120 A grain and Ø 115 /
50511120

Brand

Bellota

EAN code

8414299941395

Use

Abrasive disc for surface finishing, maintenance works and
repair of farming tools. Also ideal for weld and adjustments.

Bullet points

You'll be able to polish and sand down steel, iron and wood without dirtying or marking the surface.

No edge will get the better of you

Abrasive disc with polyester support fabrics that are resistant to wear and tear, longer lasting and better finishes.

Description

Fibreglass concave base flap disc for wood-metal grinding, A grain. Premium quality A abrasive grain (aluminium oxide - corundum) for an optimum ratio between performance and speed of stock removal for maximum cost-effectiveness. Polyester-backed cloth to extend the lifespan of the abrasive grain. Fibreglass concave base for edges and edge finishing work. Compliant with UNE EN 13743 standard. Use on portable angle grinders for surface dressing, maintenance and grinding of steel, iron and wood.

Characteristics and attributes

Attributes

Grain size: 120

Characteristics

Disc type: Grinding

Base material: Fibreglass

Application: Metal

Valid for work: Steel parts,Cleaning of various surfaces

Geometry: Concave

Type of abrasive: Corundum

Grain size: 120

Maximum rotational speed (in rpm): 13280

Peripheral speed (m/s): Máx. 80

Machine type: Movable grinder

Inner shaft diameter (mm): 22.2

Finish level: Fine

Number of sheets: 90
