Point chisel

Product reference  
5821-16x350

Octagonal point chisel made of  
Cr.V. steel. 350x16mm /  
582116350

Brand

Bellota

EAN code

8414299128406

Use

Use it for general breakage, for channelling, removing concrete remains or those of other materials.

Bullet points

Can cope with anything. Highest quality chrome vanadium steel, induction tempered and totally hardened.

Avoid fights and injury. Heat treated in three distinct work areas: head, edge and body.

It will be with you for many years. Angled, bevelled and varnished tips.

Description

Professional octagonal point chisel made of high quality chrome vanadium steel, with induction hardened and tempered areas.

Differentiated heat treatment in the 3 different working areas: Head (to ensure user safety), Tip (for maximum duration and service life) and Body (to reduce vibrations when striking). Ground, chamfered and varnished tips. For working stones and opening cracks.

## Characteristics and attributes

Attributes

Item length (in mm): 16

Section (in mm): 16

Characteristics

Tip width (in mm): -

Material: Chromium-vanadium

Section (in mm): 16

Shape: Octagonal

Treated head (anti-splinter safety)

Treated tip (resistance)

Usage: Use it for general breakage, for channelling, removing concrete remains or those of other materials.
