

FOR THE WORKSHOP / TOOLS FOR THE WORKSHOP / SCREWDRIVERS /  
Cabinet tip

Product reference

66200-6.5x150

## Cabinet Tip Screwdriver

66200-6.5x150 / 6620065150

Brand

Bellota

EAN code

8414299148992

Use

For jobs involving tightening  
and removing screw

### Bullet points

Robust and resistant. Screwdriver manufactured in chrome, molybdenum and vanadium o withstand tightening torsion.  
Geometry of the socket ensures optimum fit, preventing the shaft from rotating within the handle.  
Comfortable grip. Trilobular shape handle allowing for greater tightening strength and 120° turns.

### Description

Professional screwdriver with chrome-molybdenum-vanadium steel shaft, maximum robustness and resistance to withstand tightening torques. Integral hardening and tempering treatment on the rod guaranteeing a hardness of 59Hrc, with anti-twist system and optimum grip, avoiding handle rotation. Tri-material handle with trilobular shape for a better transmission of the tightening force. It adapts perfectly to the natural movement of the hand, allowing 120 degree rotations. Machined and blued tip for a perfect screw fit. For tightening and loosening screws, especially for electricians and for tightening screws in terminal strips.

### Characteristics and attributes

#### Attributes

Mouth width (in mm): 6.5

Rod length (in mm): 150

#### Characteristics

Tip thickness (mm): 1.2

Mouth type: Cabinet

Blued tip

Rod Material: Chromium molybdenum vanadium  
Rod finish: Chrome-plated  
Anti-rotation rod  
Handle material: Polypropylene;Elastomer  
Usage: For jobs involving tightening and removing screw
