Chisel for workshop

Product reference

8241-250

Mechanic burin made of Cr.V.  
steel. 250mm / 8241250

Brand

Bellota

EAN code

8414299145908

Use

Specially for industrial use. Channels, even in hard-to-reach areas, removes spot welds and other residue.

Bullet points

Can cope with anything. Highest quality chrome vanadium steel, induction tempered and totally hardened.

Avoid fights and injury. Heat treated in three distinct work areas: head, edge and body.

It will be with you for many years. Angled, bevelled and varnished tips.

Description

Professional mechanic burin made of high quality chrome vanadium steel, with induction hardened and tempered areas.

Differentiated heat treatment in the 3 different working areas: Head (to ensure user safety), Tip (for maximum duration and service life) and Body (to reduce vibrations when striking). Ground, chamfered and varnished tips. For channel opening and weld cleaning.
