PRK5751P

5 flat prong rake with anti-twist  
system / PRK5751P

Brand

Bellota

EAN code

8414299699388

Use

To remove and spread soil.

Bullet points

Made of one-piece forged steel to last for many years.

It will never let you down at the critical moment. Hardened and heat-treated.

It incorporates the anti-twist system in the eye, which in combination with the special anti-twist handle makes any twisting, dancing or movement impossible. Just combine it with a BELLOTA handle and you can start stirring and spreading concrete, cement, sand, stone...

Description

Professional 5 flat-prongs rake with anti-twist system, made of one-piece forged steel, maximum durability. Hardened and heat-treated prongs, high resistance to wear and deformation. It incorporates the anti-twist system in the eye by means of grooves that block the turning of the rake. Combined with the anti-twist handle, the rake neither twists nor loosens and the perfect joint lasts longer. The eye is perfectly defined, without burrs. To remove and spread soil.
